BUILDING RELIABLE AND RESILIENT GRID

IMPROVING THE QUALITY OF LIFE

RESEARCH AND INNOVATION

TECHNICAL PAPERS

1

INNOVATIVE SOLUTIONS FOR PLACEMENT OF STRAIN GAUGES ON LATTICE TOWERS: TSDOS

2

CONSIDERATION OF SOCIO-ECONOMIC VALUES IN TRANSMISSION LINE ENGINEERING: TSDOS

3

THE CHALLENGES FOR SUCCESSFUL EPC TRANSMISSION PROJECTS: TSDOS

4

CHALLENGES IN PERFORMING STRUCTURAL ANALYSIS OF EXISTING LATTICE TOWERS: TSDOS

5

A NEED FOR IMPROVEMENT IN ARM DESIGN: CONSIDERATION FOR NEW DESIGN APPROACH: TSDOS

6

SILICON EFFECT COLOR TRANSFORMATION ON GALV. STEEL LATTICE TOWERS: TSDOS

7

WHY SOURCE INSPECTION IS CRITICAL FOR TRANSMISSION STRUCTURES: TSDOS, EDM

8

THE RIGHT CHOICE OF STEEL FOR LATTICE STEEL TOWERS: TSDOS, EDM

9

LESSON LEARNED ON THE CHOICE OF MATERIAL FOR LATTICE STEEL TRANSMISSION TOWER STRUCTURES: EDM

RESEARCH AND INNOVATION

TECHNICAL PAPERS

10

RISK MITIGATION PLANNING IN SUCCESSFUL EPC PROJECT: TSDOS, ASCE

11

SUSTAINABILITY APPROACH IN TRANSMISSION LINE ENGINEERING: ASCE, INTERNATIONAL CONFERENCE ON SUSTAINABLE INFRASTRUCTURE (ICSI)

12

H₂S ENTRAPMENT AND CORROSION ON DIRECT EMBEDDED GALVANIZED STEEL TRANSMISSION POLES:ASCE/SEI

13

SILICON EFFECT COLOR TRANSFORMATION ON GALVANIZED STEEL LATTICE TOWERS: IEEE

14

CHALLENGES IN EXECUTING LARGE AND COMPLEX TRANSMISSION PROJECTS: PLATTS TRANSMISSION PLANNING AND DEVELOPMENT FORUM

15

DESIGN AND ANALYSIS OF TRANSMISSION LINE TOWERS

AT SANPEC, RESEARCH AND DEVELOPMENT (R&D) FORM THE BACKBONE OF INNOVATION, DRIVING THE IMPROVEMENT OF TRANSMISSION AND DISTRIBUTION INFRASTRUCTURE. SANPEC'S DEDICATED R&D TEAMS GO BEYOND CONVENTIONAL INNOVATION LABS, RELENTLESSLY EXPLORING BREAKTHROUGH TECHNOLOGIES AND METHODOLOGIES THAT ENHANCE GRID RELIABILITY, RESILIENCE, SAFETY, AND EFFICIENCY.

THROUGH STRATEGIC COLLABORATIONS WITH LEADING GLOBAL RESEARCH INSTITUTIONS, SANPEC ENSURES THAT EVERY ADVANCEMENT IS GROUNDED IN RIGOROUS SCIENTIFIC RESEARCH AND INDUSTRY'S BEST PRACTICES.

BRINGING ENGINEERING EXCELLENCE
